SUMMARY

I am a Full Stack Developer with strong expertise in building scalable web applications using React.js, Node.js, Express.js, and MongoDB. I'm skilled in developing secure REST APIs and real-time applications, with an emphasis on responsive user interfaces and efficient code. My experience with DevOps tools like Docker and a passion for clean code drive my approach to enhancing user experience and performance

EDUCATION

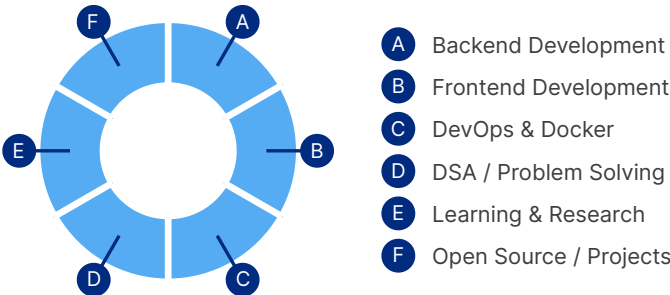

B.Tech
St Francis Institute of technology
12/2025 - Present Mumbai, India

Higher Secondary Certificate
S.V.P. Junior College of Science & Commerce

LANGUAGES

English Native ●●●●●●

MY TIME

SKILLS

Gmail	Vercel	GitHub	React
Node.js	Express.js	MongoDB	
REST	Tailwind	GSAP	Docker
GitHub Actions	Linux	HTML	
CSS	JavaScript	Java	Python
Bash	Redux Toolkit	Git	
Visual Studio Code	Postman		
Data Structures	MYSQL		

PROJECTS

- WHATSAPP**
- A real-time personal chat application
- Developed a real-time personal chat application using React.js, Node.js, Express.js, and MongoDB with features including instant messaging, real-time notifications, online/offline user presence, and video call integration
 - Designed and implemented scalable REST APIs and optimized MongoDB database schemas for efficient real-time communication
 - Built a secure and responsive user interface, ensuring a seamless cross-device experience and low-latency interactions
 - Integrated authentication and real-time socket-based communication for enhanced user engagement and reliability

STRENGTHS

Your Strength

Backend Development

Experienced in designing secure REST APIs and scalable server-side architectures.

Team Collaboration

Worked effectively in small teams using Git, GitHub, and agile development practices.

Quick Learner

<https://whatsapp-three-amber.vercel.app/>
Adapt quickly to new technologies, tools, and development workflows.

PROJECTS

SWASTHYA

📅 12/2025 - 05/2026

A full-stack Ayurveda-based health platform

- Developed a full-stack Ayurveda-based health platform delivering personalized protein, nutrition, and wellness insights through interactive calculators and real-time health tracking
- Built a dynamic and responsive frontend to improve user engagement and promote lifestyle awareness based on Ayurveda principles
- Implemented secure backend APIs for user authentication, profile management, data handling, and real-time updates
- Deployed the application using modern hosting and CI/CD practices
