SUMMARY

Full Stack Developer with strong expertise in building scalable web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in developing secure REST APIs and real-time applications, with an emphasis on responsive user interfaces, WebSockets/WebRTC, and efficient code. Experienced with DevOps tools like Docker, Redis, and CI/CD, with a focus on clean, performant code.

EDUCATION

St. Francis Institute of Technology (SFIT) <i>B.E. in Information Technology; SGPA: 8.3</i>	Mumbai, India 2025 – Present
S.V.P. Junior College of Science & Commerce <i>Higher Secondary Certificate (HSC)</i>	Mumbai, India

EXPERIENCE

IEEE, SFIT <i>Joint Tech Head</i> Co-led the technical vertical for IEEE SFIT, managing digital infrastructure and technical support for chapter events.	Mumbai, India 2025 – Current
CSI, SFIT <i>Technical Executive</i> Coordinated HackX 2.0, a 24-hour hackathon with 150+ participants, managing technical infrastructure and cross-functional teams.	Mumbai, India 2025 – 2026

PROJECTS

Swasthya <i>React, Node.js, Redis, BullMQ, Groq AI, Docker</i> GitHub Preview	12/2025 – 05/2026
- Built an AI-powered Ayurveda healthcare platform delivering personalized nutrition and wellness insights through Groq-AI-driven calculators and real-time health tracking. - Implemented a BullMQ-based, three-stage email notification system via the Brevo API for appointment booking, 24-hour, and 2-hour reminders. - Added Redis caching with dynamic TTL strategies across multiple controllers, and wrote Jest unit tests for Redis-integrated functions and auth flows.	
Video-RAG <i>Python, LangChain, ChromaDB, Whisper, Mistral AI</i> GitHub	2025
- Built a Python CLI for video transcription and retrieval-augmented Q&A, combining Whisper transcription with a ChromaDB vector store. - Designed a RAG pipeline using LangChain and Mistral AI to answer natural-language questions grounded in video content.	
Real-Time Chat App <i>React.js, Node.js, Express.js, MongoDB, WebRTC</i> GitHub Preview	09/2025 – 12/2025
- Developed a real-time personal chat application with instant messaging, presence detection, and video call integration. - Designed scalable REST APIs and optimized MongoDB schemas for low-latency, socket-based communication. - Used Socket.io for real-time messaging and presence updates, and WebRTC for peer-to-peer video calling with low-latency connections.	

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, Java, Bash, SQL
Frameworks & Libraries: React, Node.js, Express.js, Redux Toolkit, Socket.io, WebRTC
Tools & Platforms: MongoDB, MySQL, Redis, Docker, GitHub Actions, Git, n8n
Concepts: REST API Design, Real-Time Systems, Data Structures & Algorithms
